SUMMARY

Versatile, detail-oriented Frontend Developer. Customer-centric approach to developing interactive web platforms. Collaborates across teams, delivering seamless, user-focused experiences using standard and custom design libraries. Adapts quickly to new tools and languages to tackle complex challenges. Creates efficient, scalable solutions tailored to project needs.

EXPERIENCE

KeLLab, LLC

Freelance Frontend Web Developer

Austin, TX

February 2024 - Present

- Rebuilt client's Extrahands website from WordPress into a functional, responsive, production-ready site using Vue.js and AWS for deployment, ensuring optimal performance across all devices for his expanding business.
- Designed and developed a fully functional, interactive, and visually engaging website for Bamboo Village Books, a book publishing company, using Vue.js, HTML, CSS, and JS for the frontend. Leveraged PS and Figma for UI/UX design, and deployed on AWS. The site was built to drive lead generation, boost book sales, enhance user engagement, support first-time authors, and scale the client's publishing business.
- Developed a medical application using Vue.js and AWS, featuring a preoperative surgical checklist to improve patient safety and reduce surgical complications and cancellations for an anesthesiology practice.

Digital Seat Media

Frontend Web Developer - Fan Engagement Team (Vue.js & UI/UX)

Austin, TX (Remote)

October 2021 - April 2025

- Key contributor in developing fan engagement apps used by over 30,000 attendees at Yankee Stadium, by leveraging Jira for project management, JSON for data handling, AWS for scalable infrastructure, and PS for visual assets, resulting in increased real-time user interaction and feedback.
- Led the design and implementation of interactive fan engagement apps using Jira, JSON, AWS, as well as PS and Figma for UI/UX design, used by thousands of collegiate fans at major sporting venues and the 2024 Olympic track trials to boost fan engagement, collect real-time feedback, and create leaderboards on the Jumbotron.
- Managed up to 15 collegiate and professional sports applications weekly for seven collegiate and two professional sports teams, focusing on real-time fan engagement and client retention. Edited APIs, and built custom fan engagement-focused applications through use of Jira, JSON, AWS, and HTML, CSS, JS, and PS for frontend customization and design.
- Spearheaded the design initiative by leveraging PS and Figma design tools with cross-functional teams to create and maintain mobile-first web applications, driving user interactions and ensuring fast load times as the apps had to be used immediately when prompting intended users at stadiums and arenas.

Lifetime Inc.
Personal Trainer and Nutritionist

Austin, TX
July 2017 – July 2022

- Delivered customized fitness and nutrition plans to 15-20 clients per month, achieving an average client retention rate of 85-90%.
- Pioneered outreach initiatives through cold texting and emailing, generating new business and building strong client relationships.

24 Hour Fitness
Personal Trainer and Nutritionist

Austin, TX
January 2016 – July 2017

- Trained 20-25 clients weekly and designed personalized nutrition education to complement fitness programs.
- Achieved Trainer of the Month recognition twice in 2017 for the highest sales performance.

EDUCATION

Texas State University
Master of Science in Human Nutrition

San Marcos, TX
2012 – 2015

- Thesis research: The photoprotective influences of tomato and broccoli's phytochemical effects in preventing nonmelanoma skin cancers. Conducted bench work for two years, growing and feeding skin cells for my skin cancer research.

University of New Orleans
Bachelor of Arts in Psychology

New Orleans, LA
February 2003 – August 2004

CERTIFICATION

University of Texas at Austin
Postgraduate Program in Artificial Intelligence and Machine Learning

Austin, TX
February 2024 – September 2024

- Focus: AI and ML technologies with practical Python, Data Analysis, and Model Building applications.

AWARDS/RECOGNITION/VOLUNTEER WORK

- Received excellent remarks in the year-end review at Digital Seat for app production and quality of work.
- Artificial Intelligence and Machine Learning Hackathon certificate of participation for predicting the annual turnover rate of a restaurant, finishing 29th out of 123 participants.
- Shining Star certificate presented in 2017 for exceeding the standards set and high performance at Lifetime.
- Volunteer at the Capital Area Food Bank of Texas, supporting our local community with a mobile food pantry and food distribution. Also, a Volunteer at Second Harvest Food Bank, assisting with the sorting and packaging.
