Summary

Versatile Software Developer with 4 years of experience designing, using a customer-first approach, and developing interactive web platforms. Skilled at collaborating with cross-functional teams to deliver seamless, user-centric experiences using Vue.js, CSS, and custom design libraries. Adept at quickly learning new tools and programming languages to tackle complex problems, ensuring efficient and scalable solutions tailored to project needs.

WORK EXPERIENCE

Freelance Frontend Developer

KeLLab, LLC

Austin, TX

February 2024 – Present

- Bamboo Village Books Publishing Company: Redesigned and developed the Bamboo Village Books website. I expanded upon the author's vision and mission for the company while optimizing its aesthetic features and creating lead generation opportunities. This resulted in a total of 341 books sold as of September 2025, compared to the total amount of 124 books sold during 2024, according to Amazon Kindle Direct Publishing Reports.
- Enhancing Elderly Lives with Extrahands: Rebuilt the client's website from WordPress using Vue.js. I addressed pain points in functionality, accessibility, and scalability. The result was a production-ready site with optimized performance across all devices for his expanding business.

Digital Seat Media-(Startup)

Frontend Web Developer - Fan Engagement Team (Vue.js & UI/UX)

Austin, TX

October 2021 - April 2025

- Led the design and implementation of apps used by over 30,000 fans at Yankee Stadium with QR code-based fan interactions. This enabled the company to collect real-time user feedback on fan-favorite items, resulting in a surge in fan interaction.
- Managed up to 15 collegiate and professional sports applications weekly for seven collegiate teams and two professional sports teams, building custom fan engagement-focused applications, editing APIs, overseeing quality assurance, and module assignments with key focus areas on real-time fan interactions and retention.
- Spearheaded the design initiative with cross-functional teams to design and maintain mobile-first web applications. This drove user interactions and ensured fast load times as the apps had to be used immediately by fans at the stadiums and arenas.

Life Time Inc.

Personal Trainer and Nutritionist

Austin, TX

July 2017 – July 2022

- Delivered customized fitness and nutrition plans to 15-20 clients per month, achieving an average client retention rate of 85-90%.
- Pioneered outreach initiatives through cold texting and emailing, generating new business and building strong client relationships.

EDUCATION

University of Texas at Austin

Postgraduate Program in Artificial Intelligence and Machine Learning

Austin, TX

February 2024 – August 2024

- Focus: AI and ML technologies with practical Python, Data Analysis, and Model Building applications.

Texas State University

Master of Science in Human Nutrition

San Marcos, TX

2012 – 2015

- Thesis research: The photoprotective influences of tomato and broccoli's phytochemical effects in preventing nonmelanoma skin cancers. Conducted bench work for two years, growing and feeding skin cells for my nonmelanoma skin cancer research.

University of New Orleans

Bachelor of Arts in Psychology

New Orleans, LA

February 2003 – August 2004

LEADERSHIP & ACHIEVEMENTS

- Shining Star certificate presented in 2017 for exceeding the standards set and high performance at Lifetime.
- Volunteer at the Capital Area Food Bank of Texas, supporting our local community with a mobile food pantry and food distribution.
- Received excellent remarks in the year-end review at Digital Seat for App production and Quality of work.
